Welcome to the

Architecture Pathway

with Ms. Gavagan

Today's Agenda 50 minute class

- Welcome
- Keeping in touch
- Syllabus
- Materials
- Semester Projects Overview
- Classroom Expectations
- Behavior Tracker

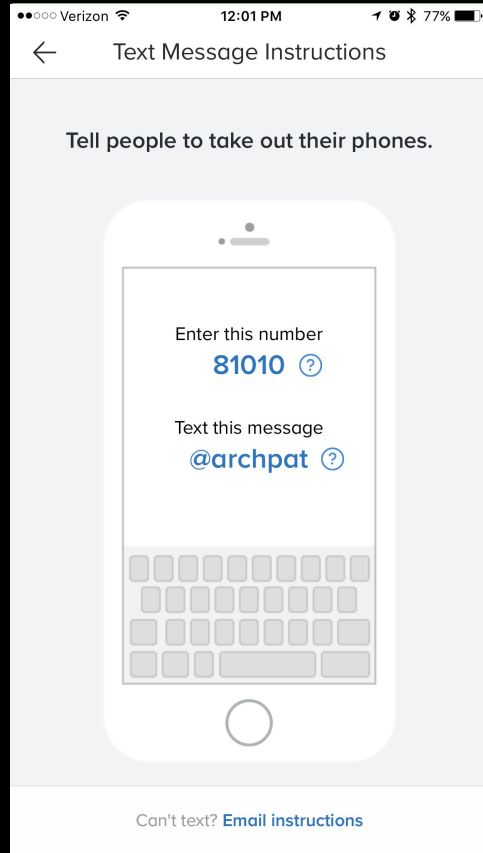

CAN INTENTIONAL
DESIGN INFLUENCE
THE WAY A PERSON
EXPERIENCES SPACE?

www.DVDgrade11.weebly.com

All 11th grade weebly can be accessed from this Weebly.

Remind

Please sign up for Remind messages for this class. This is how I will send you necessary reminders and information.

Hello how are we supposed to do anything in this building and what's the deal with the move?

Syllabus Info

Let's read over the syllabus together.

Topics:

Course Description

Course Goals

Grading

Field Trips

Classroom Expectations

The rest of syllabus is covered in slide show

**Architect's Scale
NOT ENGINEERS
SCALE**

**You want numbers
like $1/16$ and $3/16$,
NOT 1:250 or
1:500**

Tacky Glue
4oz or bigger

X-Acto knife

#1 is most basic

#1 Craft Knife
(make sure you get
blades to match
your knife)

X-Acto blades

**Make sure they
match your knife.
Most knives will
use #11 blades --
this is preferred.**

**Pack of 40
pictured, you can
also get pack of
100.**

**Building
materials
TBD**

Chipboard

Museum Board

Foam Core Board

(and other materials used at firms)

Supplies should be stored in this
room.

All supplies should be purchased
and in the classroom *by Friday,*
8/25

Cube Project

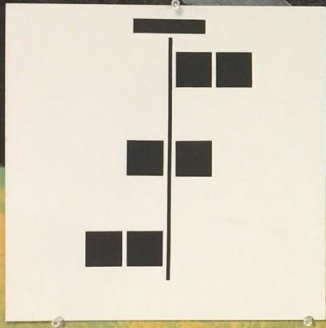

Craft Craft Craft

Line Square Rectangle

Relationships, Asymmetrical Balance

Build out Composition

Color, Hierarchy, Rhythm, Pattern

care

LINE

A line is a mark between two points. There are various types of lines, from straight to squiggly to curved and more. Lines can be used for a wide range of purposes: stressing a word or phrase, connecting content to one another, creating patterns and much more.

SHAPE

Height + width = shape. We all learned basic shapes in grade school - triangles, squares, circles and rectangles. Odd or lesser seen shapes can be used to attract attention.

There are three basic types of shape: geometric (triangles, squares, circles etc), natural (leaves, animals, trees, people), and abstracted (icons, stylizations, graphic representations etc).

VALUE

Value is how light or how dark an area looks. A gradient, shown above, is a great way to visualize value - everything from dark to white, all the shades in-between, has a value. Use value to create depth and light; to create a pattern; to lead the eye; or to emphasize.

COLOR

Color is used to generate emotions, define importance, create visual interest and more. CMYK (cyan/magenta/yellow/black) is subtractive; RGB (red/green/blue) is additive.

Some colors are warm and active (orange, red); some are cool and passive (blue, purple).

There are various color types (primary to analogous) and relationships (monochromatic to triad) worth learning more about as well.

TEXTURE

Texture relates to the surface of an object; the look or feel of it. Concrete has a rough texture; drywall has a smooth and subtle texture. Using texture in design is a great way to add depth and visual interest. Printed material has actual, textile texture while screen material has implied texture.

Space is the area around or between elements in a design. It can be used to separate or group information. Use it effectively to: give the eye a rest; define importance; lead the eye through a design and more.

SIZE

Size is how small or large something is: a small shirt vs. an extra large shirt, for example. Use size to define importance. Create visual interest in a design (via contrasting sizes), attract attention and more.

SPACE

Art Principles

(Principles of the Visual Language)

Rhythm: when elements are repeated in a certain direction.

••••• RHYTHM

Pattern: when you repeat a 'motif' or design many times.

Balance: can be either symmetrical or asymmetrical. Organised in an even way.

Proportion: refers to the relationship between the size or scale of objects etc...

Visual Movement: when forms, values, patterns, lines, shapes or colours seem to create action

Variety: when there are lots of different shapes, colours, forms, textures patterns lines or values in the work.

Emphasis: when one part of an artwork stands out and attracts the eye (the tree on the left).

a high contrast image

Contrast: very different tones shown together.

Harmony: when the elements work together to create a pleasing arrangement.

Unity: when an artwork seems whole, complete together.

 Daily: warm-up sketching exercises

  Weekly: critique pin-ups

 Monday/Wednesday:

Work time, Conferencing with Gavagan

 Friday:

Field trips, Arch history, Podcast

Office Hours (extra work time):

Wednesday Morning 8a - 9a

Thursday Afternoon 4p - 5p

Classroom Expectations

Tracker

The goal of the tracker is to quantify behavior. This number will be used to decide who goes on field trips, who gets first choice on project topics, etc.

Learning Env

Everyone wants to work in a place that is conducive to learning. Most rules simply are in place to make sure no one's learning is impeded.

Class Entry

Students will enter class, collect their behavior tracker, leave their phone, and have a seat to begin their sketch activity for the day.

Class Exit

Students will not leave the class until dismissed by group. This will ensure we are leaving a space better than we found it.

Phone Use

If students want to use phones during work time for music only, that will be allowed on an individual basis by teacher.

Criticism

Critiques are a very important part of this class. Please be prepared to give meaningful feedback as well as accept feedback.

MISTAKES ARE PART OF LEARNING

★ ★ *Fail Spectacularly* ★ ★

FAILURE IS NOT FATAL
